I only really started watching this documentary on natural optical illusions because my daughter was watching it. I had no idea most of these places existed, so I found it a lot more compelling than I thought it would be. I know the people explaining how the illusions happened were meant to be experts, but honestly, I found some of their explanations a bit far-fetched. I mean, how much can we really know about these natural wonders? Other than that, though, I thought it was fascinating. I particularly loved the mirages in Wadi Rum in southern Jordan. It made me want to watch more documentaries in the future.
