إختبار اللغة الإنجليزية – الفروع الأكاديمية

إعداد المدرس الأستاذ محمد الراميني – للعام الدراسي 2022 صيفي

• Read the following text and then answer the questions that follow :

Learning a second language has many benefits. It can help us in the following ways: Firstly, it improves the memory and heightens creativity. Secondly, it increases cognitive health later in life. Thirdly, it enhances mental flexibility. What is remarkable, though, is that high communicative ability can still be found in people who do not have any spoken language at all.

Several decades ago, there was great media attention on a deaf man who could not communicate by either sign language or spoken language, and yet was shown to have remarkably high brain function and recognition skills. He found other ways to communicate, such as giving objects to people or using facial expressions to show that he needed something.

His methods of communication were basic but very effective, and his intelligence is thought to be at least as higher as an average speaking person. Despite this, attempts to teach him either sign language or basic speech were all unsuccessful. We could ask what might have happened if he had been taught these skills earlier in life.

So, scientists are now asking what this means for those of us who find language learning difficult. Should we carry on, or is it enough to focus instead on becoming expert communicators?

Both personal attributes are valuable in the workplace – as much as they are in life!

• Questions :

AB.P.61

Entrepreneur : A word meaning someone who sets up a business. In the Middle East today, entrepreneurship is particularly important among young people, because of the competitive job market. It is important to give young people the knowledge so that they can help themselves. If they cannot find jobs, they can create their own and then, ideally , generate jobs for others. Organisations have been set up to guide young people through the process of business creation. There are training courses and programmes to support this cause. Universities in the region have started teaching entrepreneurship courses to students. Even large businesses now support young entrepreneurs.

The common philosophy is as follows : give young people the opportunity to create their own companies so that they can have control over their own economic futures. In the Middle East, it is a critical learning experience for young people.

Most doctors used to be sceptical about the validity of homoeopathy, acupuncture and other forms of complementary medicine. If patients wanted to receive this kind of non-conventional treatment, **they** used to have to consult a private practitioner who was likely not to have a medical degree. However, in recent years, the perception of **this type of treatment** has changed. These days, many family doctors study complementary medicine alongside conventional treatments, and many complementary medicine consultants also have medical degrees.

Whereas critics used to say that there was no scientific evidence that non-conventional treatments actually worked, now it is more common for medical experts to recognise that conventional medicine may not always be the only way to treat an ailment.

At a surgery in London, 70 per cent of patients who were offered the choice between a herbal or a conventional medicine for common complaints such as insomnia, arthritis and migraines chose the herbal remedy. Fifty per cent of patients then said that the treatment helped. One doctor said, "I now consider homoeopathy to be a viable option for many different conditions, including anxiety, depression and certain allergies. It provides another option when conventional medicine does not address the problem adequately."

However, complementary medicine cannot be used for all medical treatments. It can never substitute for immunisations as it will not produce the antibodies needed to protect against childhood diseases. It also cannot be used to protect against malaria.

One doctor said, "I will always turn to conventional medical treatment first to ensure that no underlying condition is missed. However, the idea of complementary treatments is no longer an alien concept. In my opinion, it should work alongside modern medicine, and not against it."

■ **Questions :**

Business Studies is a popular choice for students who are choosing a degree course in the UK. After graduating, some go on to further study, but most of them take up employment. Many large companies offer graduate training schemes, which are a kind of apprenticeship. We went to meet twenty-two-year-old Ricky Miles, who is about to graduate in **the subject**.

Teacher
Mohamad Al-Ramini
0799762289

• **How long have you been studying Business Studies, Ricky?**

It's a four-year course, including two periods of work experience. Each one lasted six months, but they weren't in the same year.

مع تحيات مدرستكم الأستاذ محمد الراميني 0799762289

• **What exactly have you studied over those four years?**

Quite a lot! Maths, of course, Accounting, Finance and Economics. Oh yes, Marketing and Sales, too. I also did a course in Management, which is about recruiting and managing staff, and how to deal with conflict, and a course in Advertising. We all had to do IT, too, because computer skills are essential.

• **What did you most enjoy about the degree?**

The work experience, definitely. I learnt so much, both times, and of course it looks great on my curriculum vitae. One of the companies offered me paid work last summer, so I managed to get more experience. Also, **I wouldn't have had much money last year if I hadn't had that job!**

• **What kind of company was that, and what did you do there?**

It was a company that provides financial products – savings and pensions, mostly. At first I just 'shadowed' different people, watching what they were doing. Then I did quite a lot of checking for them – you know, checking their calculations. When I went back in the summer, I was in the sales department. My job was to follow up web enquiries, and send out further information to possible clients. I enjoyed **it**, and I wouldn't have had that opportunity if I hadn't done the work experience first.

• **What are you planning to do next?**

I've just applied for a job with a bank. I have the right qualifications, but I know there will be a lot of other applicants. I'll just have to wait and see if I get an interview. If I do, I'll have to prepare really carefully.
